DETAILED ACTION

Applicant's amendment dated 09/20/2004 has been received and entered. By the amendment, claims 109-166 are remain pending in the application.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 109-166 stand rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 2, 26 and 50 of U.S. Patent No. 6,621,535. Although the conflicting claims are not identical, they are not patentably distinct from each other because both application and the US Patent disclose the same semiconductor device for display device having a second insulating comprising an DLC layer over the first organic insulating layer.

Applicant contends that the independent claims of the present application recite a light-emitting layer while Fukada does not teach or suggest at least this feature of the present invention (amendment, page 17). The Examiner respectfully disagrees with the Applicant's viewpoint. In particular, Fukada do disclose a semiconductor device can be used for an LCD

Art Unit: 2871

device as well as an electroluminescence display (EL)(i.e., having a light-emitting layer)(see Embodiment 6, col. 6, line 11). In addition, it would have been obvious to one of ordinary skill in the art using a semiconductor device (e.g., active matrix display) for an EL device as claimed as evidence from Yanai et al. (US 5,432,527)(see col. 21, lines 65-68).

Accordingly, the double-patenting rejection stand.

Note: The Examiner thanks to the Applicant's Attorney, Eric J. Robinson, for the telephone interview on 11/22-23/2004 in which the Examiner suggested Applicant to file a Terminal Disclaimer to overcome the Double-Patenting rejection in order to expedite the process of the application. However, the Applicant did not accept to file the Terminal Disclaimer and prefer to issue a new office action in writing.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
